#### **DETAILED ACTION**

Receipt is acknowledged of Applicant's Information Disclosure Statements filed on 02/24/2009 and 01/27/2006.

Claims 1-6 are pending in the instant application.

#### **Priority**

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

#### Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.

(j) CLAIM OR CLAIMS (commencing on a separate sheet).

(k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

A heading for the title of section h) BRIEF DESCRIPTION OF THE SEVERAL

VIEWS OF THE DRAWING(S) is required in the specification, while headings for other

sections are recommended.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being

indefinite for failing to particularly point out and distinctly claim the subject matter which

applicant regards as the invention.

The term "briefly" in claim 1 is a relative term, which renders the claim indefinite.

The term "briefly impinging" is not defined by the claim, the specification does not

provide a standard for ascertaining the requisite degree, and one of ordinary skill in the

art would not be reasonably apprised of the scope of the invention. It is not clear what

level of the closeness constitutes of "briefly". Therefore, one would not know what are

the metes and bounds of the claims.

Regarding claim 1, it is unclear what the term "multiplicity of individual changes"

mean. Please clarify.

Regarding claim 1, it is unclear what the term "shading elevations" mean. Please

clarify.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over BOCCHIALINI et al (WO 98/58685) in view of HOFFMAN et al (US 5,254,348).

Applicant's claims are directed to a plaster for transdermal delivery of an active agent comprising of: a transparent top layer comprising a multiplicity of optical lenses organized in a planar arrangement; a transparent adhesive layer that contains the active substance. Additional limitations include: permeability of the human skin; external light source.

BOCCHIALINI teaches a plaster (see pg. 5, line 19) for transdermal delivery of a medicament (see pg. 7, line 5), which would read on an active agent, comprised of: a transparent (see pg. 5, line 20; pg. 7, line 3) backing layer (see pg. 6, line 32), which would read on lenses organized in a planar arrangement; a transparent adhesive layer (see pg. 7, line 10) that contains the active substance. Additional limitations include: permeability (pg. 5, line 19) of the human skin (see pg. 5, line 11); laser beam (see pg. 5, line 20), which would read on external light source.

The reference does not specifically teach setting the focal point of the optical lenses into the stratum corneum as claimed by Applicant. The focal point of an external light source into the stratum corneum is clearly a result effective parameter that a

Application/Control Number: 10/566,236 Page 5

Art Unit: 1618

person of ordinary skill in the art would routinely optimize. Optimization of parameters is a routine practice that would be obvious for a person of ordinary skill in the art to employ and reasonably would expect success. It would have been customary for an artisan of ordinary skill to determine the optimal focal point of the laser beam in order to best achieve the desired results, such as enhancing drug permeation into the skin. Thus, absent some demonstration of unexpected results from the claimed parameters, this optimization of light focal point would have been obvious at the time of Applicant's invention.

Telephonic Inquiries

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Jake M. Vu whose telephone number is (571)272-8148.

The examiner can normally be reached on Mon-Tue and Thu-Fri 8:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Michael Hartley can be reached on (571) 272-0616. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
